

DevOps adoption: driving speed, efficiency, and better collaboration

Adaptavist's 2021 State of Atlassian report takes a look at the future state of the Atlassian ecosystem.

Building on our 2020 findings, we surveyed over 1,000 users of Atlassian tools and services, representing every major region and size of organisation, and asked how they are using DevOps now – and their plans for the future.

What does the future look like for DevOps?

Adoption of DevOps continues to grow year on year – increasing from 48% in 2020 to 54% in 2021.

Which of these statements best describe your organisation's approach to DevOps

Top 3 reasons why companies aren't adopting a DevOps strategy

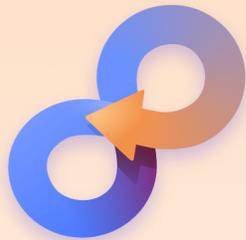

- 1 Lack of automation capabilities
- 2 Inadequate skills/training
- 3 Budget constraints

However, these reasons are also some of the benefits organisations stand to gain from its adoption.

Why deploy DevOps across your business?

DevOps promises speed, efficiency, and better collaboration

- Automate manual workflows**
81% of respondents say automation is a leading driver for DevOps.
- Faster development cycles**
76% of respondents say DevOps allows for faster development cycles.
